

Cell Regenerex *EGF Serum*

Encourage the appearance of healthier, younger looking skin with Cell Regenerex with Epidermal Growth Factor (EGF). EGF, a Nobel Prize award subject for its anti-aging benefits, helps accelerate the growth of new skin cells and aids in minimizing wrinkles to achieve younger, fresher looking skin.

Epidermal Growth Factors are naturally produced by the body, therefore Cell Regenerex with EGF is easily recognized by the skin and supplements the body's production of EGF to assist with vital cell turn over. In addition, EGF helps neutralize inflamed or irritated skin caused from factors such as environmental stress.

Key Features and Benefits:

- EGF's main function is to accelerate cell growth, cell division and cell turnover.
- EGF is naturally produced by the body. When applied topically, it is recognized by the skin as a familiar substance.
- EGF is a small protein comprised of 53 amino acids.
- EGF is a Nobel Prize award subject for its anti-aging benefits.
- Originally used to enhance wound healing, EGF is an effective calming solution to use after chemical peels and skin care treatments such as microdermabrasion and aggressive exfoliators.
- EGF also serves as a 'super-antioxidant' that acts aggressively to neutralize free radicals.

Instructions:

Apply twice daily after cleansing and before serums.

Retail Price: \$69.95 USD
